PLEASE RETURN THIS FORM TO:

Congressman Ken Calvert
3400 Central Ave, Ste. 200
Riverside, California 92506

909 784-4300 (if you have any questions)

NOTE: The Privacy Act requires that you authorize access to your private

the operator to lose control of the craft. We often fly our models at organized events where there are hundreds of operators participate. We need the use of our full complement of radio frequencies. in order to assure a safe flying environment.

I do not think it would be very smart of the FCC to try to improve the operating conditions of land mobile radio users at the expense of radio control modelers. The FCC may not think we are as important as business users of radios, but we have a considerable investment in our models and in our radio equipment. The hobby provides many hours of enjoyment to thousands of people like myself and contributes to the advancement and development of the commercial aviation industry.

Please help me continue the safe enjoyment of my pastime by not allowing the FCC to carry out its proposals for the 72 - 76 MHz Band.

Sincerely,
Gary C. Hicken
